

Building Technology

Basic Mathematics I for Building Technology

Assignment 1

Instructions: Answer all questions. Show formula, substitution, calculation, units and technical interpretation.

Section A: Formula and Concept Questions

1. Explain the use of the formula below and identify the meaning of the symbols. (4 marks)

$$\frac{a}{b} + \frac{c}{d} = \frac{ad+bc}{bd}$$

2. Explain the use of the formula below and identify the meaning of the symbols. (4 marks)

$$\mathrm{Percentage} = \frac{\mathrm{Part}}{\mathrm{Whole}} \times 100\%$$

3. Explain the use of the formula below and identify the meaning of the symbols. (4 marks)

$$\mathrm{Ratio} = a:b$$

4. Explain the use of the formula below and identify the meaning of the symbols. (4 marks)

$$P = 2(l+w)$$

5. Explain the use of the formula below and identify the meaning of the symbols. (4 marks)

$$A = lw$$

Section B: Applied Problems

6. Solve a building technology calculation problem involving mortar mixing. Show all working and write one technical interpretation. (10 marks)
7. Solve a building technology calculation problem involving wastage allowance. Show all working and write one technical interpretation. (10 marks)
8. Solve a building technology calculation problem involving floor areas. Show all working and write one technical interpretation. (10 marks)
9. Solve a building technology calculation problem involving wall lengths. Show all working and write one technical interpretation. (10 marks)
10. Solve a building technology calculation problem involving material ordering. Show all working and write one technical interpretation. (10 marks)
11. Solve a building technology calculation problem involving mortar mixing. Show all working and write one technical interpretation. (10 marks)
12. Solve a building technology calculation problem involving wastage allowance. Show all working and write one technical interpretation. (10 marks)
13. Solve a building technology calculation problem involving floor areas. Show all working and write one technical interpretation. (10 marks)
14. Solve a building technology calculation problem involving wall lengths. Show all working and write one technical interpretation. (10 marks)
15. Solve a building technology calculation problem involving material ordering. Show all working and write one technical interpretation. (10 marks)
16. Solve a building technology calculation problem involving mortar mixing. Show all working and write one technical interpretation. (10 marks)
17. Solve a building technology calculation problem involving wastage allowance. Show all working and write one technical interpretation. (10 marks)
18. Solve a building technology calculation problem involving floor areas. Show all working and write one technical interpretation. (10 marks)
19. Solve a building technology calculation problem involving wall lengths. Show all working and write one technical interpretation. (10 marks)
20. Solve a building technology calculation problem involving material ordering. Show all working and write one technical interpretation. (10 marks)

References and Learning Sources

These learner materials are original notes prepared for Mr Mwirigi Mathematics Training Hub. The topic sequencing and level are informed by standard engineering mathematics references and the uploaded curriculum/OS materials. No textbook pages or solution-manual pages have been reproduced.
