

Building Technology

Basic Mathematics I for Building Technology

Revision Booklet

Use these questions for CAT, assignment preparation and summative revision.

Formula Recall

1. State where this formula is applied and create one original example.

$$\frac{a}{b} + \frac{c}{d} = \frac{ad+bc}{bd}$$

2. State where this formula is applied and create one original example.

$$\mathrm{Percentage} = \frac{\mathrm{Part}}{\mathrm{Whole}} \times 100\%$$

3. State where this formula is applied and create one original example.

$$\mathrm{Ratio} = a:b$$

4. State where this formula is applied and create one original example.

$$P = 2(l+w)$$

5. State where this formula is applied and create one original example.

$$A = lw$$

Structured Revision

1. A realistic building technology task involves wastage allowance. Formulate the calculation, solve it, and interpret your result.
2. A realistic building technology task involves floor areas. Formulate the calculation, solve it, and interpret your result.
3. A realistic building technology task involves wall lengths. Formulate the calculation, solve it, and interpret your result.
4. A realistic building technology task involves material ordering. Formulate the calculation, solve it, and interpret your result.
5. A realistic building technology task involves mortar mixing. Formulate the calculation, solve it, and interpret your result.
6. A realistic building technology task involves wastage allowance. Formulate the calculation, solve it, and interpret your result.
7. A realistic building technology task involves floor areas. Formulate the calculation, solve it, and interpret your result.
8. A realistic building technology task involves wall lengths. Formulate the calculation, solve it, and interpret your result.
9. A realistic building technology task involves material ordering. Formulate the calculation, solve it, and interpret your result.
10. A realistic building technology task involves mortar mixing. Formulate the calculation, solve it, and interpret your result.
11. A realistic building technology task involves wastage allowance. Formulate the calculation, solve it, and interpret your result.
12. A realistic building technology task involves floor areas. Formulate the calculation, solve it, and interpret your result.
13. A realistic building technology task involves wall lengths. Formulate the calculation, solve it, and interpret your result.
14. A realistic building technology task involves material ordering. Formulate the calculation, solve it, and interpret your result.
15. A realistic building technology task involves mortar mixing. Formulate the calculation, solve it, and interpret your result.
16. A realistic building technology task involves wastage allowance. Formulate the calculation, solve it, and interpret your result.
17. A realistic building technology task involves floor areas. Formulate the calculation, solve it, and interpret your result.
18. A realistic building technology task involves wall lengths. Formulate the calculation, solve it, and interpret your result.

19. A realistic building technology task involves material ordering. Formulate the calculation, solve it, and interpret your result.
20. A realistic building technology task involves mortar mixing. Formulate the calculation, solve it, and interpret your result.
21. A realistic building technology task involves wastage allowance. Formulate the calculation, solve it, and interpret your result.
22. A realistic building technology task involves floor areas. Formulate the calculation, solve it, and interpret your result.
23. A realistic building technology task involves wall lengths. Formulate the calculation, solve it, and interpret your result.
24. A realistic building technology task involves material ordering. Formulate the calculation, solve it, and interpret your result.
25. A realistic building technology task involves mortar mixing. Formulate the calculation, solve it, and interpret your result.
26. A realistic building technology task involves wastage allowance. Formulate the calculation, solve it, and interpret your result.
27. A realistic building technology task involves floor areas. Formulate the calculation, solve it, and interpret your result.
28. A realistic building technology task involves wall lengths. Formulate the calculation, solve it, and interpret your result.
29. A realistic building technology task involves material ordering. Formulate the calculation, solve it, and interpret your result.
30. A realistic building technology task involves mortar mixing. Formulate the calculation, solve it, and interpret your result.
31. A realistic building technology task involves wastage allowance. Formulate the calculation, solve it, and interpret your result.
32. A realistic building technology task involves floor areas. Formulate the calculation, solve it, and interpret your result.
33. A realistic building technology task involves wall lengths. Formulate the calculation, solve it, and interpret your result.
34. A realistic building technology task involves material ordering. Formulate the calculation, solve it, and interpret your result.
35. A realistic building technology task involves mortar mixing. Formulate the calculation, solve it, and interpret your result.
36. A realistic building technology task involves wastage allowance. Formulate the calculation, solve it, and interpret your result.

37. A realistic building technology task involves floor areas. Formulate the calculation, solve it, and interpret your result.
38. A realistic building technology task involves wall lengths. Formulate the calculation, solve it, and interpret your result.
39. A realistic building technology task involves material ordering. Formulate the calculation, solve it, and interpret your result.
40. A realistic building technology task involves mortar mixing. Formulate the calculation, solve it, and interpret your result.
41. A realistic building technology task involves wastage allowance. Formulate the calculation, solve it, and interpret your result.
42. A realistic building technology task involves floor areas. Formulate the calculation, solve it, and interpret your result.
43. A realistic building technology task involves wall lengths. Formulate the calculation, solve it, and interpret your result.
44. A realistic building technology task involves material ordering. Formulate the calculation, solve it, and interpret your result.
45. A realistic building technology task involves mortar mixing. Formulate the calculation, solve it, and interpret your result.
46. A realistic building technology task involves wastage allowance. Formulate the calculation, solve it, and interpret your result.
47. A realistic building technology task involves floor areas. Formulate the calculation, solve it, and interpret your result.
48. A realistic building technology task involves wall lengths. Formulate the calculation, solve it, and interpret your result.
49. A realistic building technology task involves material ordering. Formulate the calculation, solve it, and interpret your result.
50. A realistic building technology task involves mortar mixing. Formulate the calculation, solve it, and interpret your result.
