

Building Technology

Basic Mathematics II for Building Technology

Revision Booklet

Use these questions for CAT, assignment preparation and summative revision.

Formula Recall

1. State where this formula is applied and create one original example.

$$A=lw$$

2. State where this formula is applied and create one original example.

$$V=lwh$$

3. State where this formula is applied and create one original example.

$$A=\pi r^2$$

4. State where this formula is applied and create one original example.

$$V=\pi r^2h$$

5. State where this formula is applied and create one original example.

$$\bar{x}=\frac{\sum x}{n}$$

Structured Revision

1. A realistic building technology task involves excavation. Formulate the calculation, solve it, and interpret your result.
2. A realistic building technology task involves cylindrical tanks. Formulate the calculation, solve it, and interpret your result.
3. A realistic building technology task involves block records. Formulate the calculation, solve it, and interpret your result.
4. A realistic building technology task involves measurement schedules. Formulate the calculation, solve it, and interpret your result.
5. A realistic building technology task involves floor slabs. Formulate the calculation, solve it, and interpret your result.
6. A realistic building technology task involves excavation. Formulate the calculation, solve it, and interpret your result.
7. A realistic building technology task involves cylindrical tanks. Formulate the calculation, solve it, and interpret your result.
8. A realistic building technology task involves block records. Formulate the calculation, solve it, and interpret your result.
9. A realistic building technology task involves measurement schedules. Formulate the calculation, solve it, and interpret your result.
10. A realistic building technology task involves floor slabs. Formulate the calculation, solve it, and interpret your result.
11. A realistic building technology task involves excavation. Formulate the calculation, solve it, and interpret your result.
12. A realistic building technology task involves cylindrical tanks. Formulate the calculation, solve it, and interpret your result.
13. A realistic building technology task involves block records. Formulate the calculation, solve it, and interpret your result.
14. A realistic building technology task involves measurement schedules. Formulate the calculation, solve it, and interpret your result.
15. A realistic building technology task involves floor slabs. Formulate the calculation, solve it, and interpret your result.
16. A realistic building technology task involves excavation. Formulate the calculation, solve it, and interpret your result.
17. A realistic building technology task involves cylindrical tanks. Formulate the calculation, solve it, and interpret your result.
18. A realistic building technology task involves block records. Formulate the calculation, solve it, and interpret your result.

19. A realistic building technology task involves measurement schedules. Formulate the calculation, solve it, and interpret your result.
20. A realistic building technology task involves floor slabs. Formulate the calculation, solve it, and interpret your result.
21. A realistic building technology task involves excavation. Formulate the calculation, solve it, and interpret your result.
22. A realistic building technology task involves cylindrical tanks. Formulate the calculation, solve it, and interpret your result.
23. A realistic building technology task involves block records. Formulate the calculation, solve it, and interpret your result.
24. A realistic building technology task involves measurement schedules. Formulate the calculation, solve it, and interpret your result.
25. A realistic building technology task involves floor slabs. Formulate the calculation, solve it, and interpret your result.
26. A realistic building technology task involves excavation. Formulate the calculation, solve it, and interpret your result.
27. A realistic building technology task involves cylindrical tanks. Formulate the calculation, solve it, and interpret your result.
28. A realistic building technology task involves block records. Formulate the calculation, solve it, and interpret your result.
29. A realistic building technology task involves measurement schedules. Formulate the calculation, solve it, and interpret your result.
30. A realistic building technology task involves floor slabs. Formulate the calculation, solve it, and interpret your result.
31. A realistic building technology task involves excavation. Formulate the calculation, solve it, and interpret your result.
32. A realistic building technology task involves cylindrical tanks. Formulate the calculation, solve it, and interpret your result.
33. A realistic building technology task involves block records. Formulate the calculation, solve it, and interpret your result.
34. A realistic building technology task involves measurement schedules. Formulate the calculation, solve it, and interpret your result.
35. A realistic building technology task involves floor slabs. Formulate the calculation, solve it, and interpret your result.
36. A realistic building technology task involves excavation. Formulate the calculation, solve it, and interpret your result.

37. A realistic building technology task involves cylindrical tanks. Formulate the calculation, solve it, and interpret your result.
38. A realistic building technology task involves block records. Formulate the calculation, solve it, and interpret your result.
39. A realistic building technology task involves measurement schedules. Formulate the calculation, solve it, and interpret your result.
40. A realistic building technology task involves floor slabs. Formulate the calculation, solve it, and interpret your result.
41. A realistic building technology task involves excavation. Formulate the calculation, solve it, and interpret your result.
42. A realistic building technology task involves cylindrical tanks. Formulate the calculation, solve it, and interpret your result.
43. A realistic building technology task involves block records. Formulate the calculation, solve it, and interpret your result.
44. A realistic building technology task involves measurement schedules. Formulate the calculation, solve it, and interpret your result.
45. A realistic building technology task involves floor slabs. Formulate the calculation, solve it, and interpret your result.
46. A realistic building technology task involves excavation. Formulate the calculation, solve it, and interpret your result.
47. A realistic building technology task involves cylindrical tanks. Formulate the calculation, solve it, and interpret your result.
48. A realistic building technology task involves block records. Formulate the calculation, solve it, and interpret your result.
49. A realistic building technology task involves measurement schedules. Formulate the calculation, solve it, and interpret your result.
50. A realistic building technology task involves floor slabs. Formulate the calculation, solve it, and interpret your result.

References and Learning Sources

These learner materials are original notes prepared for Mr Mwirigi Mathematics Training Hub. The topic sequencing and level are informed by standard engineering mathematics references and the uploaded curriculum/OS materials. No textbook pages or solution-manual pages have been reproduced.
