

Building Technology

Basic Mathematics I

Assignment 1 - Questions Only

Instructions: Answer all questions. Show formula, substitution, calculation, units and interpretation.

Section A: Formula and Concept Questions

1. Explain the meaning of the formula below and identify its main symbols. (4 marks)

$$a/b + c/d = (ad + bc)/bd$$

2. Explain the meaning of the formula below and identify its main symbols. (4 marks)

$$\text{Percentage} = (\text{Part/Whole}) \times 100\%$$

3. Explain the meaning of the formula below and identify its main symbols. (4 marks)

$$\text{Ratio} = a : b$$

4. Explain the meaning of the formula below and identify its main symbols. (4 marks)

$$\text{Perimeter: } P = 2(l + w)$$

5. Explain the meaning of the formula below and identify its main symbols. (4 marks)

$$\text{Area: } A = lw$$

Section B: Applied Questions

Problem Set 1

6. Solve a building technology problem involving mortar ratios. Show formula, substitution, correct units and a technical interpretation. (10 marks)
7. Solve a building technology problem involving wastage allowance. Show formula, substitution, correct units and a technical interpretation. (10 marks)
8. Solve a building technology problem involving site measurement. Show formula, substitution, correct units and a technical interpretation. (10 marks)
9. Solve a building technology problem involving wall length calculations. Show formula, substitution, correct units and a technical interpretation. (10 marks)
10. Solve a building technology problem involving material quantity checks. Show formula, substitution, correct units and a technical interpretation. (10 marks)

Problem Set 2

11. Solve a building technology problem involving mortar ratios. Show formula, substitution, correct units and a technical interpretation. (10 marks)
12. Solve a building technology problem involving wastage allowance. Show formula, substitution, correct units and a technical interpretation. (10 marks)
13. Solve a building technology problem involving site measurement. Show formula, substitution, correct units and a technical interpretation. (10 marks)
14. Solve a building technology problem involving wall length calculations. Show formula, substitution, correct units and a technical interpretation. (10 marks)
15. Solve a building technology problem involving material quantity checks. Show formula, substitution, correct units and a technical interpretation. (10 marks)

Problem Set 3

16. Solve a building technology problem involving mortar ratios. Show formula, substitution, correct units and a technical interpretation. (10 marks)
17. Solve a building technology problem involving wastage allowance. Show formula, substitution, correct units and a technical interpretation. (10 marks)
18. Solve a building technology problem involving site measurement. Show formula, substitution, correct units and a technical interpretation. (10 marks)
19. Solve a building technology problem involving wall length calculations. Show formula, substitution, correct units and a technical interpretation. (10 marks)
20. Solve a building technology problem involving material quantity checks. Show formula, substitution, correct units and a technical interpretation. (10 marks)

Problem Set 4

21. Solve a building technology problem involving mortar ratios. Show formula, substitution, correct units and a technical interpretation. (10 marks)
22. Solve a building technology problem involving wastage allowance. Show formula, substitution, correct units and a technical interpretation. (10 marks)
23. Solve a building technology problem involving site measurement. Show formula, substitution, correct units and a technical interpretation. (10 marks)
24. Solve a building technology problem involving wall length calculations. Show formula, substitution, correct units and a technical interpretation. (10 marks)
25. Solve a building technology problem involving material quantity checks. Show formula, substitution, correct units and a technical interpretation. (10 marks)
