

Building Technology

Basic Mathematics II

Assignment 1 - Questions Only

Instructions: Answer all questions. Show formula, substitution, calculation, units and interpretation.

Section A: Formula and Concept Questions

1. Explain the meaning of the formula below and identify its main symbols. (4 marks)

Rectangle area: $A = lw$

2. Explain the meaning of the formula below and identify its main symbols. (4 marks)

Volume: $V = lwh$

3. Explain the meaning of the formula below and identify its main symbols. (4 marks)

Circle area: $A = \pi r^2$

4. Explain the meaning of the formula below and identify its main symbols. (4 marks)

Cylinder volume: $V = \pi r^2 h$

5. Explain the meaning of the formula below and identify its main symbols. (4 marks)

Mean: $\bar{x} = \Sigma x/n$

Section B: Applied Questions

Problem Set 1

6. Solve a building technology problem involving floor-slab area. Show formula, substitution, correct units and a technical interpretation. (10 marks)
7. Solve a building technology problem involving foundation excavation. Show formula, substitution, correct units and a technical interpretation. (10 marks)
8. Solve a building technology problem involving cylindrical tanks. Show formula, substitution, correct units and a technical interpretation. (10 marks)
9. Solve a building technology problem involving block-production records. Show formula, substitution, correct units and a technical interpretation. (10 marks)
10. Solve a building technology problem involving building drawings. Show formula, substitution, correct units and a technical interpretation. (10 marks)

Problem Set 2

11. Solve a building technology problem involving floor-slab area. Show formula, substitution, correct units and a technical interpretation. (10 marks)
12. Solve a building technology problem involving foundation excavation. Show formula, substitution, correct units and a technical interpretation. (10 marks)
13. Solve a building technology problem involving cylindrical tanks. Show formula, substitution, correct units and a technical interpretation. (10 marks)
14. Solve a building technology problem involving block-production records. Show formula, substitution, correct units and a technical interpretation. (10 marks)
15. Solve a building technology problem involving building drawings. Show formula, substitution, correct units and a technical interpretation. (10 marks)

Problem Set 3

16. Solve a building technology problem involving floor-slab area. Show formula, substitution, correct units and a technical interpretation. (10 marks)
17. Solve a building technology problem involving foundation excavation. Show formula, substitution, correct units and a technical interpretation. (10 marks)
18. Solve a building technology problem involving cylindrical tanks. Show formula, substitution, correct units and a technical interpretation. (10 marks)
19. Solve a building technology problem involving block-production records. Show formula, substitution, correct units and a technical interpretation. (10 marks)
20. Solve a building technology problem involving building drawings. Show formula, substitution, correct units and a technical interpretation. (10 marks)

Problem Set 4

21. Solve a building technology problem involving floor-slab area. Show formula, substitution, correct units and a technical interpretation. (10 marks)
22. Solve a building technology problem involving foundation excavation. Show formula, substitution, correct units and a technical interpretation. (10 marks)
23. Solve a building technology problem involving cylindrical tanks. Show formula, substitution, correct units and a technical interpretation. (10 marks)
24. Solve a building technology problem involving block-production records. Show formula, substitution, correct units and a technical interpretation. (10 marks)
25. Solve a building technology problem involving building drawings. Show formula, substitution, correct units and a technical interpretation. (10 marks)
