

Building Technology

Engineering Mathematics II

Assignment 1 - Questions Only

Instructions: Answer all questions. Show formula, substitution, calculation, units and interpretation.

Section A: Formula and Concept Questions

1. Explain the meaning of the formula below and identify its main symbols. (4 marks)

$$dy/dx = f'(x)$$

2. Explain the meaning of the formula below and identify its main symbols. (4 marks)

$$\int_a^b f(x) dx$$

3. Explain the meaning of the formula below and identify its main symbols. (4 marks)

$$R = A + B$$

4. Explain the meaning of the formula below and identify its main symbols. (4 marks)

$$AX = B$$

5. Explain the meaning of the formula below and identify its main symbols. (4 marks)

$$s = \sqrt{[\Sigma(x - \bar{x})^2 / (n - 1)]}$$

Section B: Applied Questions

Problem Set 1

6. Solve a building technology problem involving cost optimization. Show formula, substitution, correct units and a technical interpretation. (10 marks)
7. Solve a building technology problem involving load components. Show formula, substitution, correct units and a technical interpretation. (10 marks)
8. Solve a building technology problem involving simultaneous quantity equations. Show formula, substitution, correct units and a technical interpretation. (10 marks)
9. Solve a building technology problem involving material-test data. Show formula, substitution, correct units and a technical interpretation. (10 marks)
10. Solve a building technology problem involving estimation checks. Show formula, substitution, correct units and a technical interpretation. (10 marks)

Problem Set 2

11. Solve a building technology problem involving cost optimization. Show formula, substitution, correct units and a technical interpretation. (10 marks)
12. Solve a building technology problem involving load components. Show formula, substitution, correct units and a technical interpretation. (10 marks)
13. Solve a building technology problem involving simultaneous quantity equations. Show formula, substitution, correct units and a technical interpretation. (10 marks)
14. Solve a building technology problem involving material-test data. Show formula, substitution, correct units and a technical interpretation. (10 marks)
15. Solve a building technology problem involving estimation checks. Show formula, substitution, correct units and a technical interpretation. (10 marks)

Problem Set 3

16. Solve a building technology problem involving cost optimization. Show formula, substitution, correct units and a technical interpretation. (10 marks)
17. Solve a building technology problem involving load components. Show formula, substitution, correct units and a technical interpretation. (10 marks)
18. Solve a building technology problem involving simultaneous quantity equations. Show formula, substitution, correct units and a technical interpretation. (10 marks)
19. Solve a building technology problem involving material-test data. Show formula, substitution, correct units and a technical interpretation. (10 marks)
20. Solve a building technology problem involving estimation checks. Show formula, substitution, correct units and a technical interpretation. (10 marks)

Problem Set 4

21. Solve a building technology problem involving cost optimization. Show formula, substitution, correct units and a technical interpretation. (10 marks)
22. Solve a building technology problem involving load components. Show formula, substitution, correct units and a technical interpretation. (10 marks)
23. Solve a building technology problem involving simultaneous quantity equations. Show formula, substitution, correct units and a technical interpretation. (10 marks)
24. Solve a building technology problem involving material-test data. Show formula, substitution, correct units and a technical interpretation. (10 marks)
25. Solve a building technology problem involving estimation checks. Show formula, substitution, correct units and a technical interpretation. (10 marks)

References and Further Reading

These notes are original learning materials prepared for Mr Mwirigi Mathematics Training Hub. They are academically informed by standard engineering mathematics texts and the local TVET curriculum framework. No textbook pages or worked examples have been copied.
