

Civil Engineering

Apply Mathematics Principles

Assignment 1 - Questions Only

Instructions: Answer all questions. Show formula, substitution, calculation, units and interpretation.

Section A: Formula and Concept Questions

1. Explain the meaning of the formula below and identify its main symbols. (4 marks)

$$\text{Percentage} = (\text{Part} / \text{Whole}) \times 100\%$$

2. Explain the meaning of the formula below and identify its main symbols. (4 marks)

$$\text{Area of trapezium: } A = \frac{1}{2}(a + b)h$$

3. Explain the meaning of the formula below and identify its main symbols. (4 marks)

$$\text{Volume: } V = Ah$$

4. Explain the meaning of the formula below and identify its main symbols. (4 marks)

$$\text{Mean: } \bar{x} = \Sigma x / n$$

5. Explain the meaning of the formula below and identify its main symbols. (4 marks)

$$\text{Gradient: } m = (y_2 - y_1) / (x_2 - x_1)$$

Section B: Applied Questions

Problem Set 1

6. Solve a civil engineering problem involving concrete mix ratios. Show formula, substitution, correct units and a technical interpretation. (10 marks)
7. Solve a civil engineering problem involving earthwork area estimates. Show formula, substitution, correct units and a technical interpretation. (10 marks)
8. Solve a civil engineering problem involving drainage cross-sections. Show formula, substitution, correct units and a technical interpretation. (10 marks)
9. Solve a civil engineering problem involving site-test records. Show formula, substitution, correct units and a technical interpretation. (10 marks)
10. Solve a civil engineering problem involving linear road-gradient models. Show formula, substitution, correct units and a technical interpretation. (10 marks)

Problem Set 2

11. Solve a civil engineering problem involving concrete mix ratios. Show formula, substitution, correct units and a technical interpretation. (10 marks)
12. Solve a civil engineering problem involving earthwork area estimates. Show formula, substitution, correct units and a technical interpretation. (10 marks)
13. Solve a civil engineering problem involving drainage cross-sections. Show formula, substitution, correct units and a technical interpretation. (10 marks)
14. Solve a civil engineering problem involving site-test records. Show formula, substitution, correct units and a technical interpretation. (10 marks)
15. Solve a civil engineering problem involving linear road-gradient models. Show formula, substitution, correct units and a technical interpretation. (10 marks)

Problem Set 3

16. Solve a civil engineering problem involving concrete mix ratios. Show formula, substitution, correct units and a technical interpretation. (10 marks)
17. Solve a civil engineering problem involving earthwork area estimates. Show formula, substitution, correct units and a technical interpretation. (10 marks)
18. Solve a civil engineering problem involving drainage cross-sections. Show formula, substitution, correct units and a technical interpretation. (10 marks)
19. Solve a civil engineering problem involving site-test records. Show formula, substitution, correct units and a technical interpretation. (10 marks)
20. Solve a civil engineering problem involving linear road-gradient models. Show formula, substitution, correct units and a technical interpretation. (10 marks)

Problem Set 4

21. Solve a civil engineering problem involving concrete mix ratios. Show formula, substitution, correct units and a technical interpretation. (10 marks)
22. Solve a civil engineering problem involving earthwork area estimates. Show formula, substitution, correct units and a technical interpretation. (10 marks)
23. Solve a civil engineering problem involving drainage cross-sections. Show formula, substitution, correct units and a technical interpretation. (10 marks)
24. Solve a civil engineering problem involving site-test records. Show formula, substitution, correct units and a technical interpretation. (10 marks)
25. Solve a civil engineering problem involving linear road-gradient models. Show formula, substitution, correct units and a technical interpretation. (10 marks)

References and Further Reading

These notes are original learning materials prepared for Mr Mwirigi Mathematics Training Hub. They are academically informed by standard engineering mathematics texts and the local TVET curriculum framework. No textbook pages or worked examples have been copied.
