

Civil Engineering

Vectors, Matrices and Data Analysis

Assignment 1 - Questions Only

Instructions: Answer all questions. Show formula, substitution, calculation, units and interpretation.

Section A: Formula and Concept Questions

1. Explain the meaning of the formula below and identify its main symbols. (4 marks)

$$\mathbf{R} = \mathbf{A} + \mathbf{B}$$

2. Explain the meaning of the formula below and identify its main symbols. (4 marks)

$$A_x = A \cos \theta$$

3. Explain the meaning of the formula below and identify its main symbols. (4 marks)

$$A_y = A \sin \theta$$

4. Explain the meaning of the formula below and identify its main symbols. (4 marks)

$$\mathbf{AX} = \mathbf{B}$$

5. Explain the meaning of the formula below and identify its main symbols. (4 marks)

$$\det(\mathbf{A}) = ad - bc$$

6. Explain the meaning of the formula below and identify its main symbols. (4 marks)

$$s = \sqrt{[\sum(x - \bar{x})^2 / (n - 1)]}$$

Section B: Applied Questions

Problem Set 1

7. Solve a civil engineering problem involving forces in members. Show formula, substitution, correct units and a technical interpretation. (10 marks)
8. Solve a civil engineering problem involving survey displacement. Show formula, substitution, correct units and a technical interpretation. (10 marks)
9. Solve a civil engineering problem involving matrix solution of equations. Show formula, substitution, correct units and a technical interpretation. (10 marks)
10. Solve a civil engineering problem involving concrete test data. Show formula, substitution, correct units and a technical interpretation. (10 marks)
11. Solve a civil engineering problem involving quality-control records. Show formula, substitution, correct units and a technical interpretation. (10 marks)

Problem Set 2

12. Solve a civil engineering problem involving forces in members. Show formula, substitution, correct units and a technical interpretation. (10 marks)
13. Solve a civil engineering problem involving survey displacement. Show formula, substitution, correct units and a technical interpretation. (10 marks)
14. Solve a civil engineering problem involving matrix solution of equations. Show formula, substitution, correct units and a technical interpretation. (10 marks)
15. Solve a civil engineering problem involving concrete test data. Show formula, substitution, correct units and a technical interpretation. (10 marks)
16. Solve a civil engineering problem involving quality-control records. Show formula, substitution, correct units and a technical interpretation. (10 marks)

Problem Set 3

17. Solve a civil engineering problem involving forces in members. Show formula, substitution, correct units and a technical interpretation. (10 marks)
18. Solve a civil engineering problem involving survey displacement. Show formula, substitution, correct units and a technical interpretation. (10 marks)
19. Solve a civil engineering problem involving matrix solution of equations. Show formula, substitution, correct units and a technical interpretation. (10 marks)
20. Solve a civil engineering problem involving concrete test data. Show formula, substitution, correct units and a technical interpretation. (10 marks)
21. Solve a civil engineering problem involving quality-control records. Show formula, substitution, correct units and a technical interpretation. (10 marks)

Problem Set 4

22. Solve a civil engineering problem involving forces in members. Show formula, substitution, correct units and a technical interpretation. (10 marks)
23. Solve a civil engineering problem involving survey displacement. Show formula, substitution, correct units and a technical interpretation. (10 marks)
24. Solve a civil engineering problem involving matrix solution of equations. Show formula, substitution, correct units and a technical interpretation. (10 marks)
25. Solve a civil engineering problem involving concrete test data. Show formula, substitution, correct units and a technical interpretation. (10 marks)
26. Solve a civil engineering problem involving quality-control records. Show formula, substitution, correct units and a technical interpretation. (10 marks)

References and Further Reading

These notes are original learning materials prepared for Mr Mwirigi Mathematics Training Hub. They are academically informed by standard engineering mathematics texts and the local TVET curriculum framework. No textbook pages or worked examples have been copied.
