

Building Technology

Basic Mathematics I

Revision Booklet

Use these questions for CAT preparation, class discussion and summative revision.

Formula Recall

1. State where the formula below can be used and create one example.

$$a/b + c/d = (ad + bc)/bd$$

2. State where the formula below can be used and create one example.

$$\text{Percentage} = (\text{Part/Whole}) \times 100\%$$

3. State where the formula below can be used and create one example.

$$\text{Ratio} = a : b$$

4. State where the formula below can be used and create one example.

$$\text{Perimeter: } P = 2(l + w)$$

5. State where the formula below can be used and create one example.

$$\text{Area: } A = lw$$

Structured Revision Questions

1. A workplace task involves wastage allowance. Select the correct mathematical method, solve the problem and write a brief interpretation.
2. A workplace task involves site measurement. Select the correct mathematical method, solve the problem and write a brief interpretation.
3. A workplace task involves wall length calculations. Select the correct mathematical method, solve the problem and write a brief interpretation.
4. A workplace task involves material quantity checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
5. A workplace task involves mortar ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.
6. A workplace task involves wastage allowance. Select the correct mathematical method, solve the problem and write a brief interpretation.
7. A workplace task involves site measurement. Select the correct mathematical method, solve the problem and write a brief interpretation.
8. A workplace task involves wall length calculations. Select the correct mathematical method, solve the problem and write a brief interpretation.
9. A workplace task involves material quantity checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
10. A workplace task involves mortar ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.
11. A workplace task involves wastage allowance. Select the correct mathematical method, solve the problem and write a brief interpretation.
12. A workplace task involves site measurement. Select the correct mathematical method, solve the problem and write a brief interpretation.
13. A workplace task involves wall length calculations. Select the correct mathematical method, solve the problem and write a brief interpretation.
14. A workplace task involves material quantity checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
15. A workplace task involves mortar ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.
16. A workplace task involves wastage allowance. Select the correct mathematical method, solve the problem and write a brief interpretation.
17. A workplace task involves site measurement. Select the correct mathematical method, solve the problem and write a brief interpretation.
18. A workplace task involves wall length calculations. Select the correct mathematical method, solve the problem and write a brief interpretation.
19. A workplace task involves material quantity checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
20. A workplace task involves mortar ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.

21. A workplace task involves wastage allowance. Select the correct mathematical method, solve the problem and write a brief interpretation.
22. A workplace task involves site measurement. Select the correct mathematical method, solve the problem and write a brief interpretation.
23. A workplace task involves wall length calculations. Select the correct mathematical method, solve the problem and write a brief interpretation.
24. A workplace task involves material quantity checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
25. A workplace task involves mortar ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.
26. A workplace task involves wastage allowance. Select the correct mathematical method, solve the problem and write a brief interpretation.
27. A workplace task involves site measurement. Select the correct mathematical method, solve the problem and write a brief interpretation.
28. A workplace task involves wall length calculations. Select the correct mathematical method, solve the problem and write a brief interpretation.
29. A workplace task involves material quantity checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
30. A workplace task involves mortar ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.
31. A workplace task involves wastage allowance. Select the correct mathematical method, solve the problem and write a brief interpretation.
32. A workplace task involves site measurement. Select the correct mathematical method, solve the problem and write a brief interpretation.
33. A workplace task involves wall length calculations. Select the correct mathematical method, solve the problem and write a brief interpretation.
34. A workplace task involves material quantity checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
35. A workplace task involves mortar ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.
36. A workplace task involves wastage allowance. Select the correct mathematical method, solve the problem and write a brief interpretation.
37. A workplace task involves site measurement. Select the correct mathematical method, solve the problem and write a brief interpretation.
38. A workplace task involves wall length calculations. Select the correct mathematical method, solve the problem and write a brief interpretation.
39. A workplace task involves material quantity checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
40. A workplace task involves mortar ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.

41. A workplace task involves wastage allowance. Select the correct mathematical method, solve the problem and write a brief interpretation.
42. A workplace task involves site measurement. Select the correct mathematical method, solve the problem and write a brief interpretation.
43. A workplace task involves wall length calculations. Select the correct mathematical method, solve the problem and write a brief interpretation.
44. A workplace task involves material quantity checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
45. A workplace task involves mortar ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.
46. A workplace task involves wastage allowance. Select the correct mathematical method, solve the problem and write a brief interpretation.
47. A workplace task involves site measurement. Select the correct mathematical method, solve the problem and write a brief interpretation.
48. A workplace task involves wall length calculations. Select the correct mathematical method, solve the problem and write a brief interpretation.
49. A workplace task involves material quantity checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
50. A workplace task involves mortar ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.
51. A workplace task involves wastage allowance. Select the correct mathematical method, solve the problem and write a brief interpretation.
52. A workplace task involves site measurement. Select the correct mathematical method, solve the problem and write a brief interpretation.
53. A workplace task involves wall length calculations. Select the correct mathematical method, solve the problem and write a brief interpretation.
54. A workplace task involves material quantity checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
55. A workplace task involves mortar ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.
56. A workplace task involves wastage allowance. Select the correct mathematical method, solve the problem and write a brief interpretation.
57. A workplace task involves site measurement. Select the correct mathematical method, solve the problem and write a brief interpretation.
58. A workplace task involves wall length calculations. Select the correct mathematical method, solve the problem and write a brief interpretation.
59. A workplace task involves material quantity checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
60. A workplace task involves mortar ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.

61. A workplace task involves wastage allowance. Select the correct mathematical method, solve the problem and write a brief interpretation.
62. A workplace task involves site measurement. Select the correct mathematical method, solve the problem and write a brief interpretation.
63. A workplace task involves wall length calculations. Select the correct mathematical method, solve the problem and write a brief interpretation.
64. A workplace task involves material quantity checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
65. A workplace task involves mortar ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.
66. A workplace task involves wastage allowance. Select the correct mathematical method, solve the problem and write a brief interpretation.
67. A workplace task involves site measurement. Select the correct mathematical method, solve the problem and write a brief interpretation.
68. A workplace task involves wall length calculations. Select the correct mathematical method, solve the problem and write a brief interpretation.
69. A workplace task involves material quantity checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
70. A workplace task involves mortar ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.
71. A workplace task involves wastage allowance. Select the correct mathematical method, solve the problem and write a brief interpretation.
72. A workplace task involves site measurement. Select the correct mathematical method, solve the problem and write a brief interpretation.
73. A workplace task involves wall length calculations. Select the correct mathematical method, solve the problem and write a brief interpretation.
74. A workplace task involves material quantity checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
75. A workplace task involves mortar ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.
76. A workplace task involves wastage allowance. Select the correct mathematical method, solve the problem and write a brief interpretation.
77. A workplace task involves site measurement. Select the correct mathematical method, solve the problem and write a brief interpretation.
78. A workplace task involves wall length calculations. Select the correct mathematical method, solve the problem and write a brief interpretation.
79. A workplace task involves material quantity checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
80. A workplace task involves mortar ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.
