

Building Technology

Basic Mathematics II

Revision Booklet

Use these questions for CAT preparation, class discussion and summative revision.

Formula Recall

1. State where the formula below can be used and create one example.

Rectangle area: $A = lw$

2. State where the formula below can be used and create one example.

Volume: $V = lwh$

3. State where the formula below can be used and create one example.

Circle area: $A = \pi r^2$

4. State where the formula below can be used and create one example.

Cylinder volume: $V = \pi r^2 h$

5. State where the formula below can be used and create one example.

Mean: $\bar{x} = \Sigma x/n$

Structured Revision Questions

1. A workplace task involves foundation excavation. Select the correct mathematical method, solve the problem and write a brief interpretation.
2. A workplace task involves cylindrical tanks. Select the correct mathematical method, solve the problem and write a brief interpretation.
3. A workplace task involves block-production records. Select the correct mathematical method, solve the problem and write a brief interpretation.
4. A workplace task involves building drawings. Select the correct mathematical method, solve the problem and write a brief interpretation.
5. A workplace task involves floor-slab area. Select the correct mathematical method, solve the problem and write a brief interpretation.
6. A workplace task involves foundation excavation. Select the correct mathematical method, solve the problem and write a brief interpretation.
7. A workplace task involves cylindrical tanks. Select the correct mathematical method, solve the problem and write a brief interpretation.
8. A workplace task involves block-production records. Select the correct mathematical method, solve the problem and write a brief interpretation.
9. A workplace task involves building drawings. Select the correct mathematical method, solve the problem and write a brief interpretation.
10. A workplace task involves floor-slab area. Select the correct mathematical method, solve the problem and write a brief interpretation.
11. A workplace task involves foundation excavation. Select the correct mathematical method, solve the problem and write a brief interpretation.
12. A workplace task involves cylindrical tanks. Select the correct mathematical method, solve the problem and write a brief interpretation.
13. A workplace task involves block-production records. Select the correct mathematical method, solve the problem and write a brief interpretation.
14. A workplace task involves building drawings. Select the correct mathematical method, solve the problem and write a brief interpretation.
15. A workplace task involves floor-slab area. Select the correct mathematical method, solve the problem and write a brief interpretation.
16. A workplace task involves foundation excavation. Select the correct mathematical method, solve the problem and write a brief interpretation.
17. A workplace task involves cylindrical tanks. Select the correct mathematical method, solve the problem and write a brief interpretation.
18. A workplace task involves block-production records. Select the correct mathematical method, solve the problem and write a brief interpretation.
19. A workplace task involves building drawings. Select the correct mathematical method, solve the problem and write a brief interpretation.
20. A workplace task involves floor-slab area. Select the correct mathematical method, solve the problem and write a brief interpretation.

21. A workplace task involves foundation excavation. Select the correct mathematical method, solve the problem and write a brief interpretation.
22. A workplace task involves cylindrical tanks. Select the correct mathematical method, solve the problem and write a brief interpretation.
23. A workplace task involves block-production records. Select the correct mathematical method, solve the problem and write a brief interpretation.
24. A workplace task involves building drawings. Select the correct mathematical method, solve the problem and write a brief interpretation.
25. A workplace task involves floor-slab area. Select the correct mathematical method, solve the problem and write a brief interpretation.
26. A workplace task involves foundation excavation. Select the correct mathematical method, solve the problem and write a brief interpretation.
27. A workplace task involves cylindrical tanks. Select the correct mathematical method, solve the problem and write a brief interpretation.
28. A workplace task involves block-production records. Select the correct mathematical method, solve the problem and write a brief interpretation.
29. A workplace task involves building drawings. Select the correct mathematical method, solve the problem and write a brief interpretation.
30. A workplace task involves floor-slab area. Select the correct mathematical method, solve the problem and write a brief interpretation.
31. A workplace task involves foundation excavation. Select the correct mathematical method, solve the problem and write a brief interpretation.
32. A workplace task involves cylindrical tanks. Select the correct mathematical method, solve the problem and write a brief interpretation.
33. A workplace task involves block-production records. Select the correct mathematical method, solve the problem and write a brief interpretation.
34. A workplace task involves building drawings. Select the correct mathematical method, solve the problem and write a brief interpretation.
35. A workplace task involves floor-slab area. Select the correct mathematical method, solve the problem and write a brief interpretation.
36. A workplace task involves foundation excavation. Select the correct mathematical method, solve the problem and write a brief interpretation.
37. A workplace task involves cylindrical tanks. Select the correct mathematical method, solve the problem and write a brief interpretation.
38. A workplace task involves block-production records. Select the correct mathematical method, solve the problem and write a brief interpretation.
39. A workplace task involves building drawings. Select the correct mathematical method, solve the problem and write a brief interpretation.
40. A workplace task involves floor-slab area. Select the correct mathematical method, solve the problem and write a brief interpretation.

41. A workplace task involves foundation excavation. Select the correct mathematical method, solve the problem and write a brief interpretation.
42. A workplace task involves cylindrical tanks. Select the correct mathematical method, solve the problem and write a brief interpretation.
43. A workplace task involves block-production records. Select the correct mathematical method, solve the problem and write a brief interpretation.
44. A workplace task involves building drawings. Select the correct mathematical method, solve the problem and write a brief interpretation.
45. A workplace task involves floor-slab area. Select the correct mathematical method, solve the problem and write a brief interpretation.
46. A workplace task involves foundation excavation. Select the correct mathematical method, solve the problem and write a brief interpretation.
47. A workplace task involves cylindrical tanks. Select the correct mathematical method, solve the problem and write a brief interpretation.
48. A workplace task involves block-production records. Select the correct mathematical method, solve the problem and write a brief interpretation.
49. A workplace task involves building drawings. Select the correct mathematical method, solve the problem and write a brief interpretation.
50. A workplace task involves floor-slab area. Select the correct mathematical method, solve the problem and write a brief interpretation.
51. A workplace task involves foundation excavation. Select the correct mathematical method, solve the problem and write a brief interpretation.
52. A workplace task involves cylindrical tanks. Select the correct mathematical method, solve the problem and write a brief interpretation.
53. A workplace task involves block-production records. Select the correct mathematical method, solve the problem and write a brief interpretation.
54. A workplace task involves building drawings. Select the correct mathematical method, solve the problem and write a brief interpretation.
55. A workplace task involves floor-slab area. Select the correct mathematical method, solve the problem and write a brief interpretation.
56. A workplace task involves foundation excavation. Select the correct mathematical method, solve the problem and write a brief interpretation.
57. A workplace task involves cylindrical tanks. Select the correct mathematical method, solve the problem and write a brief interpretation.
58. A workplace task involves block-production records. Select the correct mathematical method, solve the problem and write a brief interpretation.
59. A workplace task involves building drawings. Select the correct mathematical method, solve the problem and write a brief interpretation.
60. A workplace task involves floor-slab area. Select the correct mathematical method, solve the problem and write a brief interpretation.

61. A workplace task involves foundation excavation. Select the correct mathematical method, solve the problem and write a brief interpretation.
62. A workplace task involves cylindrical tanks. Select the correct mathematical method, solve the problem and write a brief interpretation.
63. A workplace task involves block-production records. Select the correct mathematical method, solve the problem and write a brief interpretation.
64. A workplace task involves building drawings. Select the correct mathematical method, solve the problem and write a brief interpretation.
65. A workplace task involves floor-slab area. Select the correct mathematical method, solve the problem and write a brief interpretation.
66. A workplace task involves foundation excavation. Select the correct mathematical method, solve the problem and write a brief interpretation.
67. A workplace task involves cylindrical tanks. Select the correct mathematical method, solve the problem and write a brief interpretation.
68. A workplace task involves block-production records. Select the correct mathematical method, solve the problem and write a brief interpretation.
69. A workplace task involves building drawings. Select the correct mathematical method, solve the problem and write a brief interpretation.
70. A workplace task involves floor-slab area. Select the correct mathematical method, solve the problem and write a brief interpretation.
71. A workplace task involves foundation excavation. Select the correct mathematical method, solve the problem and write a brief interpretation.
72. A workplace task involves cylindrical tanks. Select the correct mathematical method, solve the problem and write a brief interpretation.
73. A workplace task involves block-production records. Select the correct mathematical method, solve the problem and write a brief interpretation.
74. A workplace task involves building drawings. Select the correct mathematical method, solve the problem and write a brief interpretation.
75. A workplace task involves floor-slab area. Select the correct mathematical method, solve the problem and write a brief interpretation.
76. A workplace task involves foundation excavation. Select the correct mathematical method, solve the problem and write a brief interpretation.
77. A workplace task involves cylindrical tanks. Select the correct mathematical method, solve the problem and write a brief interpretation.
78. A workplace task involves block-production records. Select the correct mathematical method, solve the problem and write a brief interpretation.
79. A workplace task involves building drawings. Select the correct mathematical method, solve the problem and write a brief interpretation.
80. A workplace task involves floor-slab area. Select the correct mathematical method, solve the problem and write a brief interpretation.
