

Building Technology

Engineering Mathematics I

Revision Booklet

Use these questions for CAT preparation, class discussion and summative revision.

Formula Recall

1. State where the formula below can be used and create one example.

Straight line: $y = mx + c$

2. State where the formula below can be used and create one example.

$\tan \theta = \text{rise/run}$

3. State where the formula below can be used and create one example.

Pyramid volume: $V = \frac{1}{3}Ah$

4. State where the formula below can be used and create one example.

Circumference: $C = \pi d$

5. State where the formula below can be used and create one example.

$dy/dx = f'(x)$

Structured Revision Questions

1. A workplace task involves stair gradients. Select the correct mathematical method, solve the problem and write a brief interpretation.
2. A workplace task involves excavation volumes. Select the correct mathematical method, solve the problem and write a brief interpretation.
3. A workplace task involves cost curves. Select the correct mathematical method, solve the problem and write a brief interpretation.
4. A workplace task involves building survey data. Select the correct mathematical method, solve the problem and write a brief interpretation.
5. A workplace task involves roof pitch. Select the correct mathematical method, solve the problem and write a brief interpretation.
6. A workplace task involves stair gradients. Select the correct mathematical method, solve the problem and write a brief interpretation.
7. A workplace task involves excavation volumes. Select the correct mathematical method, solve the problem and write a brief interpretation.
8. A workplace task involves cost curves. Select the correct mathematical method, solve the problem and write a brief interpretation.
9. A workplace task involves building survey data. Select the correct mathematical method, solve the problem and write a brief interpretation.
10. A workplace task involves roof pitch. Select the correct mathematical method, solve the problem and write a brief interpretation.
11. A workplace task involves stair gradients. Select the correct mathematical method, solve the problem and write a brief interpretation.
12. A workplace task involves excavation volumes. Select the correct mathematical method, solve the problem and write a brief interpretation.
13. A workplace task involves cost curves. Select the correct mathematical method, solve the problem and write a brief interpretation.
14. A workplace task involves building survey data. Select the correct mathematical method, solve the problem and write a brief interpretation.
15. A workplace task involves roof pitch. Select the correct mathematical method, solve the problem and write a brief interpretation.
16. A workplace task involves stair gradients. Select the correct mathematical method, solve the problem and write a brief interpretation.
17. A workplace task involves excavation volumes. Select the correct mathematical method, solve the problem and write a brief interpretation.
18. A workplace task involves cost curves. Select the correct mathematical method, solve the problem and write a brief interpretation.
19. A workplace task involves building survey data. Select the correct mathematical method, solve the problem and write a brief interpretation.
20. A workplace task involves roof pitch. Select the correct mathematical method, solve the problem and write a brief interpretation.

21. A workplace task involves stair gradients. Select the correct mathematical method, solve the problem and write a brief interpretation.
22. A workplace task involves excavation volumes. Select the correct mathematical method, solve the problem and write a brief interpretation.
23. A workplace task involves cost curves. Select the correct mathematical method, solve the problem and write a brief interpretation.
24. A workplace task involves building survey data. Select the correct mathematical method, solve the problem and write a brief interpretation.
25. A workplace task involves roof pitch. Select the correct mathematical method, solve the problem and write a brief interpretation.
26. A workplace task involves stair gradients. Select the correct mathematical method, solve the problem and write a brief interpretation.
27. A workplace task involves excavation volumes. Select the correct mathematical method, solve the problem and write a brief interpretation.
28. A workplace task involves cost curves. Select the correct mathematical method, solve the problem and write a brief interpretation.
29. A workplace task involves building survey data. Select the correct mathematical method, solve the problem and write a brief interpretation.
30. A workplace task involves roof pitch. Select the correct mathematical method, solve the problem and write a brief interpretation.
31. A workplace task involves stair gradients. Select the correct mathematical method, solve the problem and write a brief interpretation.
32. A workplace task involves excavation volumes. Select the correct mathematical method, solve the problem and write a brief interpretation.
33. A workplace task involves cost curves. Select the correct mathematical method, solve the problem and write a brief interpretation.
34. A workplace task involves building survey data. Select the correct mathematical method, solve the problem and write a brief interpretation.
35. A workplace task involves roof pitch. Select the correct mathematical method, solve the problem and write a brief interpretation.
36. A workplace task involves stair gradients. Select the correct mathematical method, solve the problem and write a brief interpretation.
37. A workplace task involves excavation volumes. Select the correct mathematical method, solve the problem and write a brief interpretation.
38. A workplace task involves cost curves. Select the correct mathematical method, solve the problem and write a brief interpretation.
39. A workplace task involves building survey data. Select the correct mathematical method, solve the problem and write a brief interpretation.
40. A workplace task involves roof pitch. Select the correct mathematical method, solve the problem and write a brief interpretation.

41. A workplace task involves stair gradients. Select the correct mathematical method, solve the problem and write a brief interpretation.
42. A workplace task involves excavation volumes. Select the correct mathematical method, solve the problem and write a brief interpretation.
43. A workplace task involves cost curves. Select the correct mathematical method, solve the problem and write a brief interpretation.
44. A workplace task involves building survey data. Select the correct mathematical method, solve the problem and write a brief interpretation.
45. A workplace task involves roof pitch. Select the correct mathematical method, solve the problem and write a brief interpretation.
46. A workplace task involves stair gradients. Select the correct mathematical method, solve the problem and write a brief interpretation.
47. A workplace task involves excavation volumes. Select the correct mathematical method, solve the problem and write a brief interpretation.
48. A workplace task involves cost curves. Select the correct mathematical method, solve the problem and write a brief interpretation.
49. A workplace task involves building survey data. Select the correct mathematical method, solve the problem and write a brief interpretation.
50. A workplace task involves roof pitch. Select the correct mathematical method, solve the problem and write a brief interpretation.
51. A workplace task involves stair gradients. Select the correct mathematical method, solve the problem and write a brief interpretation.
52. A workplace task involves excavation volumes. Select the correct mathematical method, solve the problem and write a brief interpretation.
53. A workplace task involves cost curves. Select the correct mathematical method, solve the problem and write a brief interpretation.
54. A workplace task involves building survey data. Select the correct mathematical method, solve the problem and write a brief interpretation.
55. A workplace task involves roof pitch. Select the correct mathematical method, solve the problem and write a brief interpretation.
56. A workplace task involves stair gradients. Select the correct mathematical method, solve the problem and write a brief interpretation.
57. A workplace task involves excavation volumes. Select the correct mathematical method, solve the problem and write a brief interpretation.
58. A workplace task involves cost curves. Select the correct mathematical method, solve the problem and write a brief interpretation.
59. A workplace task involves building survey data. Select the correct mathematical method, solve the problem and write a brief interpretation.
60. A workplace task involves roof pitch. Select the correct mathematical method, solve the problem and write a brief interpretation.

61. A workplace task involves stair gradients. Select the correct mathematical method, solve the problem and write a brief interpretation.
62. A workplace task involves excavation volumes. Select the correct mathematical method, solve the problem and write a brief interpretation.
63. A workplace task involves cost curves. Select the correct mathematical method, solve the problem and write a brief interpretation.
64. A workplace task involves building survey data. Select the correct mathematical method, solve the problem and write a brief interpretation.
65. A workplace task involves roof pitch. Select the correct mathematical method, solve the problem and write a brief interpretation.
66. A workplace task involves stair gradients. Select the correct mathematical method, solve the problem and write a brief interpretation.
67. A workplace task involves excavation volumes. Select the correct mathematical method, solve the problem and write a brief interpretation.
68. A workplace task involves cost curves. Select the correct mathematical method, solve the problem and write a brief interpretation.
69. A workplace task involves building survey data. Select the correct mathematical method, solve the problem and write a brief interpretation.
70. A workplace task involves roof pitch. Select the correct mathematical method, solve the problem and write a brief interpretation.
71. A workplace task involves stair gradients. Select the correct mathematical method, solve the problem and write a brief interpretation.
72. A workplace task involves excavation volumes. Select the correct mathematical method, solve the problem and write a brief interpretation.
73. A workplace task involves cost curves. Select the correct mathematical method, solve the problem and write a brief interpretation.
74. A workplace task involves building survey data. Select the correct mathematical method, solve the problem and write a brief interpretation.
75. A workplace task involves roof pitch. Select the correct mathematical method, solve the problem and write a brief interpretation.
76. A workplace task involves stair gradients. Select the correct mathematical method, solve the problem and write a brief interpretation.
77. A workplace task involves excavation volumes. Select the correct mathematical method, solve the problem and write a brief interpretation.
78. A workplace task involves cost curves. Select the correct mathematical method, solve the problem and write a brief interpretation.
79. A workplace task involves building survey data. Select the correct mathematical method, solve the problem and write a brief interpretation.
80. A workplace task involves roof pitch. Select the correct mathematical method, solve the problem and write a brief interpretation.

References and Further Reading

These notes are original learning materials prepared for Mr Mwirigi Mathematics Training Hub. They are academically informed by standard engineering mathematics texts and the local TVET curriculum framework. No textbook pages or worked examples have been copied.
