

Building Technology

Engineering Mathematics II

Revision Booklet

Use these questions for CAT preparation, class discussion and summative revision.

Formula Recall

1. State where the formula below can be used and create one example.

$$dy/dx = f'(x)$$

2. State where the formula below can be used and create one example.

$$\int_a^b f(x) dx$$

3. State where the formula below can be used and create one example.

$$R = A + B$$

4. State where the formula below can be used and create one example.

$$AX = B$$

5. State where the formula below can be used and create one example.

$$s = \sqrt{[\Sigma(x - \bar{x})^2 / (n - 1)]}$$

Structured Revision Questions

1. A workplace task involves load components. Select the correct mathematical method, solve the problem and write a brief interpretation.
2. A workplace task involves simultaneous quantity equations. Select the correct mathematical method, solve the problem and write a brief interpretation.
3. A workplace task involves material-test data. Select the correct mathematical method, solve the problem and write a brief interpretation.
4. A workplace task involves estimation checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
5. A workplace task involves cost optimization. Select the correct mathematical method, solve the problem and write a brief interpretation.
6. A workplace task involves load components. Select the correct mathematical method, solve the problem and write a brief interpretation.
7. A workplace task involves simultaneous quantity equations. Select the correct mathematical method, solve the problem and write a brief interpretation.
8. A workplace task involves material-test data. Select the correct mathematical method, solve the problem and write a brief interpretation.
9. A workplace task involves estimation checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
10. A workplace task involves cost optimization. Select the correct mathematical method, solve the problem and write a brief interpretation.
11. A workplace task involves load components. Select the correct mathematical method, solve the problem and write a brief interpretation.
12. A workplace task involves simultaneous quantity equations. Select the correct mathematical method, solve the problem and write a brief interpretation.
13. A workplace task involves material-test data. Select the correct mathematical method, solve the problem and write a brief interpretation.
14. A workplace task involves estimation checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
15. A workplace task involves cost optimization. Select the correct mathematical method, solve the problem and write a brief interpretation.
16. A workplace task involves load components. Select the correct mathematical method, solve the problem and write a brief interpretation.
17. A workplace task involves simultaneous quantity equations. Select the correct mathematical method, solve the problem and write a brief interpretation.
18. A workplace task involves material-test data. Select the correct mathematical method, solve the problem and write a brief interpretation.
19. A workplace task involves estimation checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
20. A workplace task involves cost optimization. Select the correct mathematical method, solve the problem and write a brief interpretation.

21. A workplace task involves load components. Select the correct mathematical method, solve the problem and write a brief interpretation.
22. A workplace task involves simultaneous quantity equations. Select the correct mathematical method, solve the problem and write a brief interpretation.
23. A workplace task involves material-test data. Select the correct mathematical method, solve the problem and write a brief interpretation.
24. A workplace task involves estimation checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
25. A workplace task involves cost optimization. Select the correct mathematical method, solve the problem and write a brief interpretation.
26. A workplace task involves load components. Select the correct mathematical method, solve the problem and write a brief interpretation.
27. A workplace task involves simultaneous quantity equations. Select the correct mathematical method, solve the problem and write a brief interpretation.
28. A workplace task involves material-test data. Select the correct mathematical method, solve the problem and write a brief interpretation.
29. A workplace task involves estimation checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
30. A workplace task involves cost optimization. Select the correct mathematical method, solve the problem and write a brief interpretation.
31. A workplace task involves load components. Select the correct mathematical method, solve the problem and write a brief interpretation.
32. A workplace task involves simultaneous quantity equations. Select the correct mathematical method, solve the problem and write a brief interpretation.
33. A workplace task involves material-test data. Select the correct mathematical method, solve the problem and write a brief interpretation.
34. A workplace task involves estimation checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
35. A workplace task involves cost optimization. Select the correct mathematical method, solve the problem and write a brief interpretation.
36. A workplace task involves load components. Select the correct mathematical method, solve the problem and write a brief interpretation.
37. A workplace task involves simultaneous quantity equations. Select the correct mathematical method, solve the problem and write a brief interpretation.
38. A workplace task involves material-test data. Select the correct mathematical method, solve the problem and write a brief interpretation.
39. A workplace task involves estimation checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
40. A workplace task involves cost optimization. Select the correct mathematical method, solve the problem and write a brief interpretation.

41. A workplace task involves load components. Select the correct mathematical method, solve the problem and write a brief interpretation.
42. A workplace task involves simultaneous quantity equations. Select the correct mathematical method, solve the problem and write a brief interpretation.
43. A workplace task involves material-test data. Select the correct mathematical method, solve the problem and write a brief interpretation.
44. A workplace task involves estimation checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
45. A workplace task involves cost optimization. Select the correct mathematical method, solve the problem and write a brief interpretation.
46. A workplace task involves load components. Select the correct mathematical method, solve the problem and write a brief interpretation.
47. A workplace task involves simultaneous quantity equations. Select the correct mathematical method, solve the problem and write a brief interpretation.
48. A workplace task involves material-test data. Select the correct mathematical method, solve the problem and write a brief interpretation.
49. A workplace task involves estimation checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
50. A workplace task involves cost optimization. Select the correct mathematical method, solve the problem and write a brief interpretation.
51. A workplace task involves load components. Select the correct mathematical method, solve the problem and write a brief interpretation.
52. A workplace task involves simultaneous quantity equations. Select the correct mathematical method, solve the problem and write a brief interpretation.
53. A workplace task involves material-test data. Select the correct mathematical method, solve the problem and write a brief interpretation.
54. A workplace task involves estimation checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
55. A workplace task involves cost optimization. Select the correct mathematical method, solve the problem and write a brief interpretation.
56. A workplace task involves load components. Select the correct mathematical method, solve the problem and write a brief interpretation.
57. A workplace task involves simultaneous quantity equations. Select the correct mathematical method, solve the problem and write a brief interpretation.
58. A workplace task involves material-test data. Select the correct mathematical method, solve the problem and write a brief interpretation.
59. A workplace task involves estimation checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
60. A workplace task involves cost optimization. Select the correct mathematical method, solve the problem and write a brief interpretation.

61. A workplace task involves load components. Select the correct mathematical method, solve the problem and write a brief interpretation.
62. A workplace task involves simultaneous quantity equations. Select the correct mathematical method, solve the problem and write a brief interpretation.
63. A workplace task involves material-test data. Select the correct mathematical method, solve the problem and write a brief interpretation.
64. A workplace task involves estimation checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
65. A workplace task involves cost optimization. Select the correct mathematical method, solve the problem and write a brief interpretation.
66. A workplace task involves load components. Select the correct mathematical method, solve the problem and write a brief interpretation.
67. A workplace task involves simultaneous quantity equations. Select the correct mathematical method, solve the problem and write a brief interpretation.
68. A workplace task involves material-test data. Select the correct mathematical method, solve the problem and write a brief interpretation.
69. A workplace task involves estimation checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
70. A workplace task involves cost optimization. Select the correct mathematical method, solve the problem and write a brief interpretation.
71. A workplace task involves load components. Select the correct mathematical method, solve the problem and write a brief interpretation.
72. A workplace task involves simultaneous quantity equations. Select the correct mathematical method, solve the problem and write a brief interpretation.
73. A workplace task involves material-test data. Select the correct mathematical method, solve the problem and write a brief interpretation.
74. A workplace task involves estimation checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
75. A workplace task involves cost optimization. Select the correct mathematical method, solve the problem and write a brief interpretation.
76. A workplace task involves load components. Select the correct mathematical method, solve the problem and write a brief interpretation.
77. A workplace task involves simultaneous quantity equations. Select the correct mathematical method, solve the problem and write a brief interpretation.
78. A workplace task involves material-test data. Select the correct mathematical method, solve the problem and write a brief interpretation.
79. A workplace task involves estimation checks. Select the correct mathematical method, solve the problem and write a brief interpretation.
80. A workplace task involves cost optimization. Select the correct mathematical method, solve the problem and write a brief interpretation.
