

Civil Engineering

Apply Mathematics Principles

Revision Booklet

Use these questions for CAT preparation, class discussion and summative revision.

Formula Recall

1. State where the formula below can be used and create one example.

$$\text{Percentage} = (\text{Part} / \text{Whole}) \times 100\%$$

2. State where the formula below can be used and create one example.

$$\text{Area of trapezium: } A = \frac{1}{2}(a + b)h$$

3. State where the formula below can be used and create one example.

$$\text{Volume: } V = Ah$$

4. State where the formula below can be used and create one example.

$$\text{Mean: } \bar{x} = \Sigma x / n$$

5. State where the formula below can be used and create one example.

$$\text{Gradient: } m = (y_2 - y_1) / (x_2 - x_1)$$

Structured Revision Questions

1. A workplace task involves earthwork area estimates. Select the correct mathematical method, solve the problem and write a brief interpretation.
2. A workplace task involves drainage cross-sections. Select the correct mathematical method, solve the problem and write a brief interpretation.
3. A workplace task involves site-test records. Select the correct mathematical method, solve the problem and write a brief interpretation.
4. A workplace task involves linear road-gradient models. Select the correct mathematical method, solve the problem and write a brief interpretation.
5. A workplace task involves concrete mix ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.
6. A workplace task involves earthwork area estimates. Select the correct mathematical method, solve the problem and write a brief interpretation.
7. A workplace task involves drainage cross-sections. Select the correct mathematical method, solve the problem and write a brief interpretation.
8. A workplace task involves site-test records. Select the correct mathematical method, solve the problem and write a brief interpretation.
9. A workplace task involves linear road-gradient models. Select the correct mathematical method, solve the problem and write a brief interpretation.
10. A workplace task involves concrete mix ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.
11. A workplace task involves earthwork area estimates. Select the correct mathematical method, solve the problem and write a brief interpretation.
12. A workplace task involves drainage cross-sections. Select the correct mathematical method, solve the problem and write a brief interpretation.
13. A workplace task involves site-test records. Select the correct mathematical method, solve the problem and write a brief interpretation.
14. A workplace task involves linear road-gradient models. Select the correct mathematical method, solve the problem and write a brief interpretation.
15. A workplace task involves concrete mix ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.
16. A workplace task involves earthwork area estimates. Select the correct mathematical method, solve the problem and write a brief interpretation.
17. A workplace task involves drainage cross-sections. Select the correct mathematical method, solve the problem and write a brief interpretation.
18. A workplace task involves site-test records. Select the correct mathematical method, solve the problem and write a brief interpretation.
19. A workplace task involves linear road-gradient models. Select the correct mathematical method, solve the problem and write a brief interpretation.
20. A workplace task involves concrete mix ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.

21. A workplace task involves earthwork area estimates. Select the correct mathematical method, solve the problem and write a brief interpretation.
22. A workplace task involves drainage cross-sections. Select the correct mathematical method, solve the problem and write a brief interpretation.
23. A workplace task involves site-test records. Select the correct mathematical method, solve the problem and write a brief interpretation.
24. A workplace task involves linear road-gradient models. Select the correct mathematical method, solve the problem and write a brief interpretation.
25. A workplace task involves concrete mix ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.
26. A workplace task involves earthwork area estimates. Select the correct mathematical method, solve the problem and write a brief interpretation.
27. A workplace task involves drainage cross-sections. Select the correct mathematical method, solve the problem and write a brief interpretation.
28. A workplace task involves site-test records. Select the correct mathematical method, solve the problem and write a brief interpretation.
29. A workplace task involves linear road-gradient models. Select the correct mathematical method, solve the problem and write a brief interpretation.
30. A workplace task involves concrete mix ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.
31. A workplace task involves earthwork area estimates. Select the correct mathematical method, solve the problem and write a brief interpretation.
32. A workplace task involves drainage cross-sections. Select the correct mathematical method, solve the problem and write a brief interpretation.
33. A workplace task involves site-test records. Select the correct mathematical method, solve the problem and write a brief interpretation.
34. A workplace task involves linear road-gradient models. Select the correct mathematical method, solve the problem and write a brief interpretation.
35. A workplace task involves concrete mix ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.
36. A workplace task involves earthwork area estimates. Select the correct mathematical method, solve the problem and write a brief interpretation.
37. A workplace task involves drainage cross-sections. Select the correct mathematical method, solve the problem and write a brief interpretation.
38. A workplace task involves site-test records. Select the correct mathematical method, solve the problem and write a brief interpretation.
39. A workplace task involves linear road-gradient models. Select the correct mathematical method, solve the problem and write a brief interpretation.
40. A workplace task involves concrete mix ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.

41. A workplace task involves earthwork area estimates. Select the correct mathematical method, solve the problem and write a brief interpretation.
42. A workplace task involves drainage cross-sections. Select the correct mathematical method, solve the problem and write a brief interpretation.
43. A workplace task involves site-test records. Select the correct mathematical method, solve the problem and write a brief interpretation.
44. A workplace task involves linear road-gradient models. Select the correct mathematical method, solve the problem and write a brief interpretation.
45. A workplace task involves concrete mix ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.
46. A workplace task involves earthwork area estimates. Select the correct mathematical method, solve the problem and write a brief interpretation.
47. A workplace task involves drainage cross-sections. Select the correct mathematical method, solve the problem and write a brief interpretation.
48. A workplace task involves site-test records. Select the correct mathematical method, solve the problem and write a brief interpretation.
49. A workplace task involves linear road-gradient models. Select the correct mathematical method, solve the problem and write a brief interpretation.
50. A workplace task involves concrete mix ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.
51. A workplace task involves earthwork area estimates. Select the correct mathematical method, solve the problem and write a brief interpretation.
52. A workplace task involves drainage cross-sections. Select the correct mathematical method, solve the problem and write a brief interpretation.
53. A workplace task involves site-test records. Select the correct mathematical method, solve the problem and write a brief interpretation.
54. A workplace task involves linear road-gradient models. Select the correct mathematical method, solve the problem and write a brief interpretation.
55. A workplace task involves concrete mix ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.
56. A workplace task involves earthwork area estimates. Select the correct mathematical method, solve the problem and write a brief interpretation.
57. A workplace task involves drainage cross-sections. Select the correct mathematical method, solve the problem and write a brief interpretation.
58. A workplace task involves site-test records. Select the correct mathematical method, solve the problem and write a brief interpretation.
59. A workplace task involves linear road-gradient models. Select the correct mathematical method, solve the problem and write a brief interpretation.
60. A workplace task involves concrete mix ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.

61. A workplace task involves earthwork area estimates. Select the correct mathematical method, solve the problem and write a brief interpretation.
62. A workplace task involves drainage cross-sections. Select the correct mathematical method, solve the problem and write a brief interpretation.
63. A workplace task involves site-test records. Select the correct mathematical method, solve the problem and write a brief interpretation.
64. A workplace task involves linear road-gradient models. Select the correct mathematical method, solve the problem and write a brief interpretation.
65. A workplace task involves concrete mix ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.
66. A workplace task involves earthwork area estimates. Select the correct mathematical method, solve the problem and write a brief interpretation.
67. A workplace task involves drainage cross-sections. Select the correct mathematical method, solve the problem and write a brief interpretation.
68. A workplace task involves site-test records. Select the correct mathematical method, solve the problem and write a brief interpretation.
69. A workplace task involves linear road-gradient models. Select the correct mathematical method, solve the problem and write a brief interpretation.
70. A workplace task involves concrete mix ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.
71. A workplace task involves earthwork area estimates. Select the correct mathematical method, solve the problem and write a brief interpretation.
72. A workplace task involves drainage cross-sections. Select the correct mathematical method, solve the problem and write a brief interpretation.
73. A workplace task involves site-test records. Select the correct mathematical method, solve the problem and write a brief interpretation.
74. A workplace task involves linear road-gradient models. Select the correct mathematical method, solve the problem and write a brief interpretation.
75. A workplace task involves concrete mix ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.
76. A workplace task involves earthwork area estimates. Select the correct mathematical method, solve the problem and write a brief interpretation.
77. A workplace task involves drainage cross-sections. Select the correct mathematical method, solve the problem and write a brief interpretation.
78. A workplace task involves site-test records. Select the correct mathematical method, solve the problem and write a brief interpretation.
79. A workplace task involves linear road-gradient models. Select the correct mathematical method, solve the problem and write a brief interpretation.
80. A workplace task involves concrete mix ratios. Select the correct mathematical method, solve the problem and write a brief interpretation.

References and Further Reading

These notes are original learning materials prepared for Mr Mwirigi Mathematics Training Hub. They are academically informed by standard engineering mathematics texts and the local TVET curriculum framework. No textbook pages or worked examples have been copied.
