Engineering Mathematics II

Revision Booklet

Use these questions for CAT preparation, class discussion and summative revision.

Formula Recall

1. State where the formula below can be used and create one example.

$$\text{Gradient} = \text{Rise/Run}$$

2. State where the formula below can be used and create one example.

$$\Delta E = L \sin \theta$$

3. State where the formula below can be used and create one example.

$$\Delta N = L \cos \theta$$

4. State where the formula below can be used and create one example.

$$\text{Area} = \frac{1}{2} |\sum x_i y_{i+1} - \sum y_i x_{i+1}|$$

5. State where the formula below can be used and create one example.

$$d = \sqrt{(\Delta E)^2 + (\Delta N)^2}$$

Structured Revision Questions

1. A workplace task involves traverse computation. Select the correct mathematical method, solve the problem and write a brief interpretation.
2. A workplace task involves plotting control lines. Select the correct mathematical method, solve the problem and write a brief interpretation.
3. A workplace task involves area by coordinates. Select the correct mathematical method, solve the problem and write a brief interpretation.
4. A workplace task involves survey closures. Select the correct mathematical method, solve the problem and write a brief interpretation.
5. A workplace task involves levelling. Select the correct mathematical method, solve the problem and write a brief interpretation.
6. A workplace task involves traverse computation. Select the correct mathematical method, solve the problem and write a brief interpretation.
7. A workplace task involves plotting control lines. Select the correct mathematical method, solve the problem and write a brief interpretation.
8. A workplace task involves area by coordinates. Select the correct mathematical method, solve the problem and write a brief interpretation.
9. A workplace task involves survey closures. Select the correct mathematical method, solve the problem and write a brief interpretation.
10. A workplace task involves levelling. Select the correct mathematical method, solve the problem and write a brief interpretation.
11. A workplace task involves traverse computation. Select the correct mathematical method, solve the problem and write a brief interpretation.
12. A workplace task involves plotting control lines. Select the correct mathematical method, solve the problem and write a brief interpretation.
13. A workplace task involves area by coordinates. Select the correct mathematical method, solve the problem and write a brief interpretation.
14. A workplace task involves survey closures. Select the correct mathematical method, solve the problem and write a brief interpretation.
15. A workplace task involves levelling. Select the correct mathematical method, solve the problem and write a brief interpretation.
16. A workplace task involves traverse computation. Select the correct mathematical method, solve the problem and write a brief interpretation.
17. A workplace task involves plotting control lines. Select the correct mathematical method, solve the problem and write a brief interpretation.
18. A workplace task involves area by coordinates. Select the correct mathematical method, solve the problem and write a brief interpretation.
19. A workplace task involves survey closures. Select the correct mathematical method, solve the problem and write a brief interpretation.
20. A workplace task involves levelling. Select the correct mathematical method, solve the problem and write a brief interpretation.

21. A workplace task involves traverse computation. Select the correct mathematical method, solve the problem and write a brief interpretation.
22. A workplace task involves plotting control lines. Select the correct mathematical method, solve the problem and write a brief interpretation.
23. A workplace task involves area by coordinates. Select the correct mathematical method, solve the problem and write a brief interpretation.
24. A workplace task involves survey closures. Select the correct mathematical method, solve the problem and write a brief interpretation.
25. A workplace task involves levelling. Select the correct mathematical method, solve the problem and write a brief interpretation.
26. A workplace task involves traverse computation. Select the correct mathematical method, solve the problem and write a brief interpretation.
27. A workplace task involves plotting control lines. Select the correct mathematical method, solve the problem and write a brief interpretation.
28. A workplace task involves area by coordinates. Select the correct mathematical method, solve the problem and write a brief interpretation.
29. A workplace task involves survey closures. Select the correct mathematical method, solve the problem and write a brief interpretation.
30. A workplace task involves levelling. Select the correct mathematical method, solve the problem and write a brief interpretation.
31. A workplace task involves traverse computation. Select the correct mathematical method, solve the problem and write a brief interpretation.
32. A workplace task involves plotting control lines. Select the correct mathematical method, solve the problem and write a brief interpretation.
33. A workplace task involves area by coordinates. Select the correct mathematical method, solve the problem and write a brief interpretation.
34. A workplace task involves survey closures. Select the correct mathematical method, solve the problem and write a brief interpretation.
35. A workplace task involves levelling. Select the correct mathematical method, solve the problem and write a brief interpretation.
36. A workplace task involves traverse computation. Select the correct mathematical method, solve the problem and write a brief interpretation.
37. A workplace task involves plotting control lines. Select the correct mathematical method, solve the problem and write a brief interpretation.
38. A workplace task involves area by coordinates. Select the correct mathematical method, solve the problem and write a brief interpretation.
39. A workplace task involves survey closures. Select the correct mathematical method, solve the problem and write a brief interpretation.
40. A workplace task involves levelling. Select the correct mathematical method, solve the problem and write a brief interpretation.

41. A workplace task involves traverse computation. Select the correct mathematical method, solve the problem and write a brief interpretation.
42. A workplace task involves plotting control lines. Select the correct mathematical method, solve the problem and write a brief interpretation.
43. A workplace task involves area by coordinates. Select the correct mathematical method, solve the problem and write a brief interpretation.
44. A workplace task involves survey closures. Select the correct mathematical method, solve the problem and write a brief interpretation.
45. A workplace task involves levelling. Select the correct mathematical method, solve the problem and write a brief interpretation.
46. A workplace task involves traverse computation. Select the correct mathematical method, solve the problem and write a brief interpretation.
47. A workplace task involves plotting control lines. Select the correct mathematical method, solve the problem and write a brief interpretation.
48. A workplace task involves area by coordinates. Select the correct mathematical method, solve the problem and write a brief interpretation.
49. A workplace task involves survey closures. Select the correct mathematical method, solve the problem and write a brief interpretation.
50. A workplace task involves levelling. Select the correct mathematical method, solve the problem and write a brief interpretation.
51. A workplace task involves traverse computation. Select the correct mathematical method, solve the problem and write a brief interpretation.
52. A workplace task involves plotting control lines. Select the correct mathematical method, solve the problem and write a brief interpretation.
53. A workplace task involves area by coordinates. Select the correct mathematical method, solve the problem and write a brief interpretation.
54. A workplace task involves survey closures. Select the correct mathematical method, solve the problem and write a brief interpretation.
55. A workplace task involves levelling. Select the correct mathematical method, solve the problem and write a brief interpretation.
56. A workplace task involves traverse computation. Select the correct mathematical method, solve the problem and write a brief interpretation.
57. A workplace task involves plotting control lines. Select the correct mathematical method, solve the problem and write a brief interpretation.
58. A workplace task involves area by coordinates. Select the correct mathematical method, solve the problem and write a brief interpretation.
59. A workplace task involves survey closures. Select the correct mathematical method, solve the problem and write a brief interpretation.
60. A workplace task involves levelling. Select the correct mathematical method, solve the problem and write a brief interpretation.

61. A workplace task involves traverse computation. Select the correct mathematical method, solve the problem and write a brief interpretation.
62. A workplace task involves plotting control lines. Select the correct mathematical method, solve the problem and write a brief interpretation.
63. A workplace task involves area by coordinates. Select the correct mathematical method, solve the problem and write a brief interpretation.
64. A workplace task involves survey closures. Select the correct mathematical method, solve the problem and write a brief interpretation.
65. A workplace task involves levelling. Select the correct mathematical method, solve the problem and write a brief interpretation.
66. A workplace task involves traverse computation. Select the correct mathematical method, solve the problem and write a brief interpretation.
67. A workplace task involves plotting control lines. Select the correct mathematical method, solve the problem and write a brief interpretation.
68. A workplace task involves area by coordinates. Select the correct mathematical method, solve the problem and write a brief interpretation.
69. A workplace task involves survey closures. Select the correct mathematical method, solve the problem and write a brief interpretation.
70. A workplace task involves levelling. Select the correct mathematical method, solve the problem and write a brief interpretation.
71. A workplace task involves traverse computation. Select the correct mathematical method, solve the problem and write a brief interpretation.
72. A workplace task involves plotting control lines. Select the correct mathematical method, solve the problem and write a brief interpretation.
73. A workplace task involves area by coordinates. Select the correct mathematical method, solve the problem and write a brief interpretation.
74. A workplace task involves survey closures. Select the correct mathematical method, solve the problem and write a brief interpretation.
75. A workplace task involves levelling. Select the correct mathematical method, solve the problem and write a brief interpretation.
76. A workplace task involves traverse computation. Select the correct mathematical method, solve the problem and write a brief interpretation.
77. A workplace task involves plotting control lines. Select the correct mathematical method, solve the problem and write a brief interpretation.
78. A workplace task involves area by coordinates. Select the correct mathematical method, solve the problem and write a brief interpretation.
79. A workplace task involves survey closures. Select the correct mathematical method, solve the problem and write a brief interpretation.
80. A workplace task involves levelling. Select the correct mathematical method, solve the problem and write a brief interpretation.

References and Further Reading

These notes are original learning materials prepared for Mr Mwirigi Mathematics Training Hub. They are academically informed by standard engineering mathematics texts and the local TVET curriculum framework. No textbook pages or worked examples have been copied.
