

Basic Mathematics II

Learner Notes

Geometry, mensuration, graphs, basic statistics, and building calculations.

Learning outcome	Focus
Apply geometry	Applied mathematics in workplace and training contexts.
Calculate area and volume	Applied mathematics in workplace and training contexts.
Present and interpret data	Applied mathematics in workplace and training contexts.

1. Topic Overview

This topic develops mathematical skills required in Building Technology. Learners should show clear method, correct units, and technical interpretation.

2. Key Formulas

$$A = lw$$

$$V = lwh$$

$$A = \pi r^2$$

$$\bar{x} = \frac{\sum x}{n}$$

3. Worked-Example Method

Step 1: identify the given data. Step 2: select the correct formula. Step 3: substitute values carefully. Step 4: compute. Step 5: interpret the answer with correct units.

$$A = lw$$

4. Practice Questions

1. Calculate area of a floor slab.

2. Find volume of concrete for a foundation.
3. Compute average block production from daily records.
