Revision Questions

Use these questions for CAT and summative assessment preparation.

Formula Practice

1. Apply the formula below in a technical example.

$$\bar{x} = \frac{\sum x}{n}$$

2. Apply the formula below in a technical example.

$$s = \sqrt{\frac{\sum (x - \bar{x})^2}{n - 1}}$$

3. Apply the formula below in a technical example.

$$P(A) = \frac{n(A)}{n(S)}$$

4. Apply the formula below in a technical example.

$$AX = B$$

Applied Practice

5. Calculate mean and standard deviation of repeated observations.
6. Solve a matrix system from survey adjustment.
7. Compute probability from survey quality data.
